WINDOWS AND DOORS

3450 SINGLE HUNG & 3400 SINGLE SLIDER WINDOWS

Strassburger single hung and single slider windows will increase your energy efficiency as well as creating the perfect look with clean lines.

3450 SINGLE HUNG & 3400 SINGLE SLIDER WINDOWS

FEATURES

Multi-chambered profiles create a thermal barrier from outdoor temperatures and provide excellent sound reduction.

Maintenance free profiles are made from an exclusive 100% virgin uPVC powder compound that is entirely lead-free.

Multiple weather stripping provides remarkable air tightness, reducing heating and air conditioning costs.

The single hung window operates by lifting the bottom sash up for controlled air movement and tilt in to make cleaning the window easier.

Our standard 7/8" glazing includes Solarban 60 double coated Low-E glass, along with argon gas to provide a better thermal barrier, accompanied with the lowest conductive warm edge spacer in the industry. This combination will increase the level of comfort in your home while decreasing your energy costs.

Interior and exterior grooves allow for additions of numerous accessories, such as an assortment of brickmoulds, nailing flanges, returns and jamb extensions.

Create virtually any combination you desire with single hung or single slider windows, mulled with the single hung picture frame. Consider varying top and bottom sashes in a single hung for a dramatic result.

Our extrusions are available in solid white and beige. We are pleased to offer the option to colour the exterior with any of our twelve standard colours. You may also choose to select a custom colour from your own colour palette to co-ordinate with your design requirements.

Our premium stainless steel constant force balance system helps to provide smooth operation of the operating sash in single hung windows.

See colour chart for actual match

Strassburger windows remarkable performance is the result of attention to the smallest detail in the quest for premium product quality.

3450 SINGLE HUNG & 3400 SINGLE SLIDER WINDOWS

All of Strassburger window systems are qualified Energy Star products and meet the efficiency requirements up to and including Zone C.

For more Energy Star Rating information see the Natural Resources Canada website: oee.nrcan.gc.ca/energystar

1. Multiple weather-stripping provides remarkable air tightness, reducing heating and air conditioning costs.
2. The full size, double-walled handle bead is exceptionally sturdy.
3. Strassburger windows have the highest number of internal chambers, giving them outstanding insulation and sound abatement qualities, as well as thermal efficiency and increased sturdiness.
4. Optional steel reinforcement in the sash is used for added strength.
5. Interior glazing bead design constitutes a key security element, allowing the window to withstand winds of over 350 km/h (220 mph).
6. Interior and exterior grooves allow for additions of numerous accessories, such as an assortment of brickmoulds, nailing flanges, returns and jamb extensions.
