ENGINEERED PERFORMANCE

Strassburger
SINCE 1949
WINDOWS AND DOORS

Unparalleled Durability and Efficiency

Sophisticated technology for truly outstanding windows and doors.

Strassburger Tilt and Turn windows and doors are designed to meet the latest and most stringent energy efficiency standards with hassle-free operation for years to come.

FEATURES

1. 3 ¼" (82.5 mm) PVC frame
2. Optimized drainage thanks to a pressure balance system and easily positioned drainage cap
3. 2.5 mm exterior walls and interior walls among the thickest on the market for maximum insulation and durability
4. Continuous double weather-stripping with polymer compression seals to eliminate air and water infiltration
5. Multi-chamber structure (17 chambers in the frame, 13 in the sash) to meet the most stringent performance and energy efficiency standards
6. Sashes designed to hold and support glass up to 1 ¾" (44.5 mm) thick
7. Multipoint locking system around the entire perimeter for perfect soundproofing and optimum security and air-tightness

ADDITIONAL FEATURES

Door compatible with even the thickest flooring 1.7" (43 mm) clearance
 Optional aluminum sill extension for door configurations
 Spring-loaded screens seamlessly incorporated into windows for sleek architectural styling

FINISHING DETAILS

Frames are equipped with numerous interior and exterior grooves for a sleek look and no interference with hinges.

Tilt and Turn. Windows and doors that meet all your needs.

Turn the handle upwards and the upper part of the sash tilts slightly to allow for safe and easy ventilation. The opening cannot exceed 4" (130 mm). No danger of intruders or an accident for children, even the rain can't get in.

Simply turn the handle to the horizontal position and the sash pivots vertically to offer a large opening for superior air circulation.

Turn the handle down and the tilt and turn window will be hermetically sealed. No air leakage, maximum security
