

SERIES 7000

PATIO DOORS

The Most Innovative And
Popular Patio Door Systems.
A Hallmark Of Quality Living.

All Strassburger patio doors have a common characteristic... quality craftsmanship and superior performance. That translates into patio doors that are built to last!

The Strassburger patio door series is often imitated but never duplicated. It opens up the future to a new generation of premium-quality all PVC doors with a host of outstanding features and benefits.

Whether you are building a new home or purchasing replacement patio doors, Strassburger Windows and Doors offers a wide range of styles that make them the ideal choice for your home's design.

ENGINEERED PERFORMANCE

Strassburger
SINCE 1949
WINDOWS AND DOORS

The remarkable performance of Strassburger patio doors is a result of attention to the smallest of details in the quest for premium product quality.

7800 Series Mechanical Sash

- | | |
|--|---|

Ind. Standard	A1	B1	C1	F1

Designed To Work Like A Charm

Try the fingertip test: Bet you can open this door with just the tip of a finger! The easiest door to operate in its category.

Our lock has retractable latches so they will not break if the door is shut with them in a closed position.

Take the monorail - the sturdy all-aluminum angle legged tracks on these doors ensure stability and ease of use.

It's smooth sliding all the way with the screen doors. The patented spring-loaded rollers are fully adjustable at each corner to prevent bothersome derailing.

The installer-friendly design means uneven surfaces are never a problem - it's a snap to plumb and square Strassburger doors.

It's always smooth and quiet sliding from the sturdy, patented dual-tandem wheels on these doors, (without failure they've withstood 119,000 test cycles carrying a 165 lb. sash - the equivalent of over 30 years of constant use), not to mention, the wheels now include sealed bearings for even longer life.

The anodized sill cover provides enhanced protection, superior drainage, and improved aesthetics. The cover comes standard on painted patio doors and is optional for white doors.

Performance and durability designed to fit your lifestyle

These doors are made with components that are built to stand the test of time. You'll enjoy a "hassle-free" door system with performance, durability, and elegance guaranteed for years of regular use. Both door styles are ideal for the variable Canadian climate, are NAFS compliant, and meet Energy Star® requirements.

- Multi-chamber profiles and multiple weatherstripping help eliminate most outside noise
- Strassburger PVC patio doors, with their exceptional insulation, are among the most energy-efficient on the market
- 100% PVC extrusions are designed to provide superior resistance to severe weather conditions
- Easy to open and close, dual-tandem nylon wheels offer a smooth and quiet operation
- Optional multi-point locking system provides heavy-duty security
- Lower sill design provides safer entry and exit
- Designed to be aesthetically and structurally compatible with other Strassburger window styles
- Operating hardware is available in several options, colours, and finishes
- Standard extrusion colour is solid white.
See colour chart for exterior standard and custom finishes

Great looking patio doors that are more energy-efficient than ever and add extra value to your home

New technology turns glass into insulation

Strassburger patio doors are glazed with cutting edge technology from Cardinal Glass Industries. Through research and engineering Cardinal glass adds new standards of comfort, energy savings, and value to your home. Cardinal glass is specifically designed to let clear light stream into your home while rejecting the sun's heat and damaging UV rays that shorten the life of drapes and furniture. All Cardinal units come complete with the Endur Warm Edge spacer which provides proven thermal and structural performance.

Double and triple glazed windows deliver thermal performance. Low conductivity warm-edge spacers keep the panes of glass apart.

Superior stability

Galvanized steel reinforced panels ensure rigidity and stable operation

Sturdy screen

Extruded screen with stainless steel screws and patented adjustable spring-loaded suspension system in each corner are designed not to derail or jam.

Increased protection

Fixed and mobile panel rails meet and interlock perfectly, making door removal from the outside almost impossible.

LoE-i89 delivers triple-pane performance in a double pane window when used in combination with other LoE glass

- remarkably low U-factors
- reflects escaping heat back into room
- high energy efficiency

LoE-180 is the ideal glass for passive solar applications

- high solar gain
- blocks interior heat loss to outside
- dramatic comfort improvements

LoE²-272 provides year round comfort

- reflects heat back into room on cold days
- promotes easier control and maintenance of interior air
- reflects harmful UV rays

LoE³-366 reflects the sun's heat without affecting the view

- provides premium insulation and comfort
- rejects 95% of sun's damaging UV rays
- highest levels of energy savings

Neat™ windows almost clean themselves

- the sun's rays loosen the dirt so rain water can wash it off
- ultra smooth glass disperses water
- windows stay cleaner longer

Perserve™ protects your glass from getting scratched or damaged in shipping, handling, and on the construction site

- factory applied protective film
- saves time, money, and jobsite hassles
- simply peels off

Standard or custom, you pick the colour

You've picked the right patio door system, now its time to pick that perfect colour. We offer a wide selection of distinctive colours formulated specifically to complement any new home design or retro-fit. Custom colour matching is available. All exterior paint colours come with a 15 year warranty.

These finishes are formulated to look better, last longer and are applied by our specialists in a controlled, dust-free environment. We take care to use only water soluble paint so clean-up and disposal is efficient and doesn't affect the environment. For more warranty information, visit our website:

Opens any way you like

Available in 2-panel, 3-panel, and 4-panel configurations with a wide variety of energy-efficient glazing options, decorative grills, and sizes. Each configuration of standard patio doors is available in three different widths and heights. Custom sizes are also available upon request.

It's All In The Details

Our attention to detail doesn't stop at the patio doors... it's the finishing touches that make a Strassburger door complete

Brickmould and trim options

A wide variety of decorative brickmoulds, jamb extensions and trim options are available to finish the patio door. Most brickmoulds have tear-out systems to allow for siding. Available in standard white, these extrusions can be painted to match your chosen door frame colour.

Choose from a variety of patterns to create a spectacular door style that complements your architecture and your individual taste.

Colonial

Grill designs complement your architectural style

Grills placed within the airspace between the insulating glass create a sleek, traditional look that is easy to clean. We offer a wide selection of grill styles and colours that will enhance the look of your doors and complement the design of the building.

Multiple shapes, sizes, and colours* of grills to choose from. Exact colour matches to grills are not always possible. Default grills are pewter or a SDL grill.

Simulated Divided Lites

Surface-mounted grill bars create a unique and distinctive multi-pane effect known as simulated divided lites (SDL).

Ladder

Prairie

Foot Lock

Convenient and easy-to-use tamper-proof foot lock provides additional security

Standard 1/2 Screen

Standard smooth sliding 1/2 width screen is equipped with patented spring-loaded rollers, fully adjustable at each corner.

Hide-Away Screen

Optional Hide-Away Screen is a unique design that allows the screen to retract and be virtually out of sight when not in use.

Blinds

Integrated aluminum mini-blinds, for maintenance-free privacy.

The Energy Plus Company

Since 1949

Proudly Canadian, we're dedicated to designing and building energy efficient products

Strassburger Energy Star® energy-efficient windows deliver year-round comfort and reduce, if not eliminate, condensation during colder weather. All Strassburger windows come with many glazing options to suit your needs and the region you live in.

To qualify for the Energy Star® mark, patio doors must meet strict technical requirements for thermal performance. They must qualify based on either their U-value (rate of heat transfer from a warm area to a cold area) or their energy rating (a scale that takes into account a product's U-value, potential solar gain and air tightness). To ensure the integrity of the Energy Star® mark, all product testing is done by accredited laboratories under standardized, quality-controlled conditions. Visit our website to review all the Energy Star® and NFRC ratings of our products.

We're so confident in the doors we design and produce, we guarantee them for life

We promise to adhere to the highest standards of honesty and integrity in all our relationships with customers, suppliers, prospects, and employees and at all times provide high-quality products and services.
